### **DAILY ASSESSMENT FORMAT**

Date:	22/05/2020	Name:	Jagadeesha Hegde
Course:	TCS-ION Career Edge	USN:	4AL17EC036
Topic:	Understand Artificial  Intelligence(AI) - Part 1  Understand Artificial Intelligence  (AI) - Part 2  Gain Foundational Skills in IT	Semester & Section:	6th A-sec
Github	Jagadeesha-036		
Repository:			

# **FORENOON SESSION DETAILS** Image of session TCS ION Digital Learning Hub Learn, Share, Collaborate **TATA CONSULTANCY SERVICES** This is to certify that Jagadeesha Hegde has successfully completed Career Edge - Knockdown the Lockdown online course offered by TCS iON Start Date: 18 May 2020 | End Date: 22 May 2020 Topics: ■ Communication Skills ■ Presentation Skills ■ Soft Skills ■ Career Guidance Framework ■ Resume Writing ■ Group Discussion Skills ■ Interview Skills ■ Business Etiquette ■ Effective Email Writing ■ Telephone Etiquette ■ Accounting Fundamentals ■ IT Foundational Skills ■ Overview of Artificial Intelligence\* (Source: NPTEL) Mchul Mchta Mehul Mehta Global Delivery Head, TCS iON

#### **Understand artificial intelligence:**

#### What is AI?

Artificial intelligence (AI) is the ability of a computer program or a machine to think and learn.

#### **Applications:**

- Computer vision
- Image recognition
- Robotics
- Language processing
- Speech processing

#### **Practical impact of AI:**

- All components are embedded in numerous devices eg :copy machines
- AI systems are in everyday use
  - Detecting credit card fraud
  - Configuring products
  - Aiding complex planning tasks
  - Advising physicians
- Intelligent tutoring systems provide students with personalized attention

#### Approaches to AI:

• Strong AI aims to build machines that can truly reason and solve problems which is self aware and whose overall intellectual ability is indistinguishable from that of a human being

Human like

Non-human like

- Weak AI: deals with the creation of some form of computer based artificial intelligence that cannot truly reason and solve problems .but can act as if it were intelligent.
- Weak AI holds that suitably programmed machines can simulate human cognition.

#### What can AI systems do:

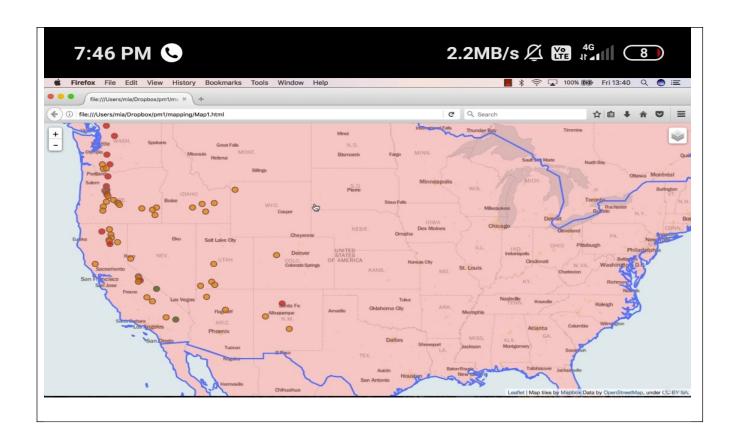

- Image recognition, when the number of objects in the image is limited
- face recognition
- Speech recognition
- Robotics: autonomous(mostly) automobile
- Natural language understanding in narrowly bounded domains
